

BALRAJ GOUD KALAL

Principal Consultant – DevOps | Cloud & CI/CD Architect | AWS | Azure | Platform Engineering | AI-Assisted DevOps

Hyderabad, Telangana, India | +91 9491487490 | kbalrajgoud4a7@gmail.com

PROFESSIONAL SUMMARY

DevOps and Cloud Engineering professional with 10+ years of experience designing scalable CI/CD platforms, cloud infrastructure, and automation frameworks across AWS and Azure environments. Currently working as Principal Consultant at Genpact delivering DevOps engineering solutions.

Specialized in architecting enterprise CI/CD pipeline frameworks, automating cloud deployments, and enabling cloud-native application delivery using modern DevOps practices. Extensive experience implementing automated deployment pipelines for AWS services such as Lambda, ECS/EKS, Glue, AppSync, S3 promotions, and Airflow DAG workflows.

Strong background in Infrastructure as Code (Terraform, Ansible), containerization, monitoring, and

Disaster Recovery automation. Proven ability to lead DevOps initiatives, troubleshoot complex delivery pipelines, collaborate with multi-team environments, and accelerate engineering productivity using AI-assisted development tools such as GitHub Copilot.

CORE COMPETENCIES

- DevOps Architecture & Platform Engineering
- CI/CD Pipeline Framework Design
- AWS & Azure Cloud Engineering
- Infrastructure as Code (Terraform, Ansible)
- Container Platforms (Docker, EKS/ECS)
- Automation & Scripting (Shell, YAML, Python)
- Disaster Recovery Automation
- Monitoring & Observability
- DevOps Troubleshooting & Release Engineering
- AI-Assisted DevOps (GitHub Copilot)

TECHNICAL SKILLS

DevOps Tools: GitLab CI/CD, Jenkins, Git, CodeCommit

Cloud Platforms: AWS, Microsoft Azure

AWS Services: EC2, ECS, EKS, Lambda, Glue, AppSync, S3, IAM, VPC, Auto Scaling, ALB, ELB, CloudWatch,

Route53, CloudFront, SQS, SNS, RDS

Azure Services: Azure API Management (APIM), Azure Monitor
Infrastructure as Code: Terraform, Ansible
Containers: Docker, Kubernetes (EKS)
Monitoring: Splunk, SolarWinds, CloudWatch
Collaboration Tools: Jira, ServiceNow
Methodologies: Agile, DevOps, CI/CD Automation

PROFESSIONAL EXPERIENCE

GENPACT – Principal Consultant (DevOps) | Dec 2024 – Present

- Leading DevOps engineering initiatives for focusing on enterprise CI/CD automation.
- Designed and implemented reusable GitLab CI/CD pipeline frameworks enabling automated deployments for multiple applications and cloud services.
- Built automated pipelines for AWS services including ECS services, S3 promotions, Airflow DAG deployments, AWS Glue jobs, Lambda functions, and AppSync APIs.
- Developed pipelines for Self-Hosted Gateways and Azure API Management integrations.
- Leveraged GitHub Copilot and AI-assisted development techniques to accelerate automation scripting and pipeline development.
- Implemented automated Disaster Recovery pipelines improving recovery readiness and deployment reliability.
- Troubleshoot complex pipeline failures and optimize CI/CD processes across multiple engineering teams.
- Collaborate with AWS, Azure, and application teams to ensure smooth cloud platform delivery.

INFOSYS – Senior Consultant (DevOps)

Client: Hitachi | May 2021 – Dec 2024

- Managed large scale AWS and Azure cloud infrastructure supporting enterprise applications.
- Implemented CI/CD pipelines and infrastructure provisioning using Terraform and Ansible.
- Supported disaster recovery planning, monitoring platforms, and environment migrations.
- Improved deployment automation and release efficiency across development teams.

INFOR GLOBAL – DevOps Engineer

Mar 2020 – May 2021

- Managed AWS infrastructure including EC2, VPC, Auto Scaling, and CloudWatch monitoring.
- Automated infrastructure provisioning and operational support tasks.
- Provided production monitoring and troubleshooting for cloud environments.

CODEBEES TECHNOLOGIES PVT LTD – Test Engineer

Client: vCom Solutions | Jan 2019 – Jul 2020

- Implemented Jenkins CI/CD pipelines and Git integrations.
- Managed Docker containers and supported Linux based environments.
- Provided monitoring and operational support using Jira and DevOps tools.

ERICSSON (Payroll: Linquest / TNS) – Assistant Engineer

Sep 2015 – Sep 2018

- Performed automation testing using Selenium and supported CI environments.
- Conducted API testing, regression testing, and automation framework execution.

KEY ACHIEVEMENTS

- Designed scalable CI/CD pipeline architecture supporting multiple AWS services and environments.
- Implemented automated disaster recovery pipelines improving deployment resiliency.
- Accelerated DevOps automation using AI tools such as GitHub Copilot.
- Delivered enterprise DevOps solutions across financial services and enterprise platforms.

Certification: AWS certified solution architect associate

TOTAL EXPERIENCE

11 Years (September 2015 – Present)
